Environmental Construction & Site Remediation

EXPERIENCE

SAFETY

RESULTS

Since 1999

Excavation & Transportation

- Mass and source soil excavation
- Drum excavation and removal
- Hydraulic hoist removal
- Dewatering with treatment
- Sheet piling and shoring
- Slurry and containment wall installation
- Transportation and disposal arrangements

Remediation System Construction

- Complete above ground and underground installations
- Soil vapor extraction/air sparge (with ozone)/vapor enhanced recovery
- Product recovery
- Groundwater extraction
- Turnkey system installations

Site Remediation

- Decommissioning
- Decontamination and industrial cleaning
- Chemical applications/injections
- Site restoration and cleanup
- Implementation of traditional and innovative remedial technologies
- HDPE fusion welding and fabrication

UST/AST

- Removals and disposal
- Installation of new fuel systems

Operation & Maintenance Services

- Comprehensive system maintenance and repairs
- System optimization
- Licensed treatment plant operators
- Emergency system response

Ecological Services

- Riverbank restoration
- Slope stabilization and erosion controls
- Sediment removal and stabilization
- Wetlands construction

Drilling Services

- Environmental
- Geotechnical
- Direct push
- Air knife, soft dig and vacuum excavation

Vapor Intrusion Services

- Soil gas investigations
- Pilot testing support
- System installation

Landfill Services

- Leachate collection systems
- Landfill gas collection systems
- Landfill caps
- Construction
