Project Manager, Field Engineer

Bauman Krueger Contractors, Inc., 1992-1995  
Project Manager, Field Engineer

### Key Projects

**Bellevue Development Site, Detroit, MI.** Proposal, presentation, contract negotiation, and managed \$38M remediation project. Highlights of this large scale site remediation project include. Mass excavation and backfill up to 32 feet in depth and along the Detroit River, installation of sheet pile wall along the Detroit River, dewatering with treatment, multiple building demolitions, MGP soil mixing and stabilization, clearing and grubbing, site restoration, and odor suppression. Excavation and backfill of 700,000 cubic yards. While completing this 2-year project, no lost time or OSHA recordable injuries occurred.

**Led the development and implementation of a comprehensive and highly adaptable health and safety program and culture.** While building the company and working with many clients, JSS was challenged to meet the specific demands for multiple client specific safety programs. Mr. Marranca developed and invested in systems to train, track, document, and instill a safety culture to meet client demands and provide a safe work environment. Due to this achievement, JSS works for some of the largest companies in the world with the most stringent safety requirements.

**Proven expertise and track record in project delivery.** Project management of hundreds of industrial services, site remediation, soil and water remediation, and excavation projects. Industries: oil and gas, pipeline/terminal, chemical, automotive, energy, waste, government/military, commercial building, industrial/manufacturing, environmental, and construction management.
