JSS MWT-150 Enclosed:
Mobile Carbon Filtration Treatment Trailer

0-150 GPM Capacity

Job Site Services, Inc. Mobile Wastewater Treatment Systems are designed for ease of set-up, operation, and tear down when the jobs complete. JSS's plug and plug and treat design boasts:

Two (2) #2 filter housings, Two (2) 2000-pound carbon vessels, Schedule 80 PVC pipe and pressure/suction inner connection hose plumbing, totalizing flow meter, vacuum loop and pressure gauges with sample ports throughout. The two vessels are set in a lead/lag configuration. Depending on filtration needs, impregnated organo clay or sand can be used instead of carbon, along with custom media options available for specific treatment applications. Job Site Services water treatment service staff is on call 24/7 to aid in the operation of this unit both on and off site.
